

# VENUMUSK

an innovative meme token based on Ethereum blockchain

# About us

VenuMusk is not just a cryptocurrency, but a whole economic system based on blockchain technologies, where each participant can change their financial reality, becoming a part of space travel and a large gaming universe.

Within VenuMusk, players and investors can participate in rescuing Venoms, developing their spaceships, creating unique strategies for interstellar travel, and interacting with other participants in the global ecosystem, receiving financial rewards for their actions.

# Tokenomics

**VenuMusk** (\$VM) token is the central element of the ecosystem.

With the tokens, users can interact within the game, receive rewards, and influence the development of the project.

## **Total supply:**

10 billion tokens (\$VM)

## **Liquidity:**

35% (3,000,000,000 \$VM) - to provide liquidity on exchange and DEX platforms, which helps attract new participants to the project and maintain trading activity.

# Tokenomics

## **Gaming ecosystem:**

20% (2,000,000,000 \$VM) -  
for use within the game, rewards,  
purchasing resource and upgrades.

## **Marketing:**

15% (1,500,000,000 \$VM) -  
for support advertising campaigns,  
partnerships, content marketing,  
as well as to promote the project  
through social media influencer,  
media and cryptocurrency experts.

## **Retro drops and airdrops:**

10% (1,000,000,000 \$VM) -  
to distribute tokens to early users,  
active players and investors.

## **Development and team:**

15% (1,500,000,000 \$VM) -  
for game development, technology  
improvement and server support.

## **Reserve fund:**

5% (500,000,000 \$VM) -  
to manage inflation, contingencies  
and maintain project stability.

# VenuMusk roadmap

**Token launch  
and marketing  
campaigns**

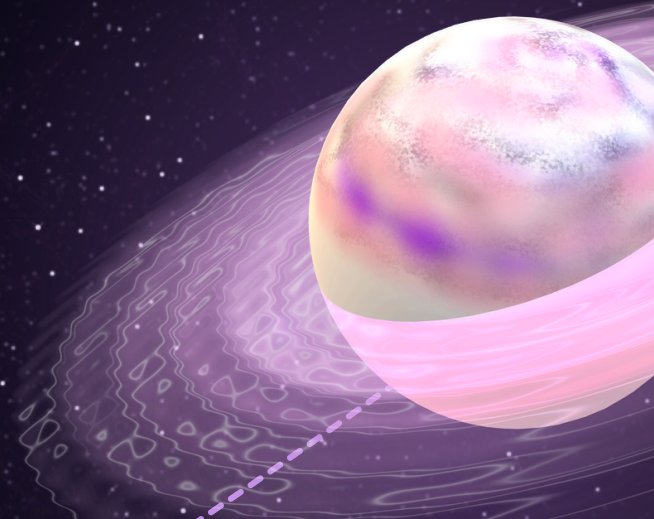

**Development of  
gameplay and  
token  
integration**

**Scaling and  
expansion**

**Global expansion  
and long-term  
development**

# Gaming ecosystem

The VenuMusk gaming ecosystem allows users to take part in saving alien civilizations, developing their technologies, building spaceships and exploring new worlds.

Players can complete missions, participate in intergalactic expeditions, extract resources and build their own galactic empires.

## Rewards and achievements

Players receive VenuMusk tokens for completing missions, participating in saving civilizations, and for other achievements in the game.

## Resource market

Players can exchange their resources for VenuMusk tokens or other in-game goods.

## Trading platform

Ability to exchange in-game items, upgrades and resources with other players.

## Upgrade mechanics

Players can upgrade their spaceships, build new technologies and explore planets.

# Unique features

## Flexibility and scalability

Blockchain technology allows for the integration of new mechanics and features into the game, supporting continuous development and updates.

## Dynamic Tokenomics

Every element of the project economy, including marketing, the gaming ecosystem, and rewards for participants, supports the demand and growth of VenuMusk tokens.

## Community and Partnership Support

The project actively works with various gaming guilds and cryptocurrency partners, which contributes to the expansion and popularization of VenuMusk in the cryptogaming community.

## Game and economic process in one project

The combination of gaming mechanics and cryptocurrency opportunities gives users not only an interesting pastime, but also real financial prospects.

# Contract information

**Contract address:**

[0xe8110cf21c745a59a8ad09a6ac51eddfbd56a5b8](#)

**Token type:**

ERC - 20

**Network:**

Ethereum

The VenuMusk contract is an ERC-20 token, which makes it compatible with popular cryptocurrency wallets and exchanges, as well as access to various decentralized applications (DApps) on the Ethereum network.

# Safety

All transactions and gaming operations are carried out through smart contracts, which guarantees a high degree of reliability and transparency.

## Smart Contract Audit

The VenuMusk contract has been audited by independent auditors to prevent vulnerabilities.

## Data protection

All personal data of users is encrypted using advanced security methods.
